Prolonged exposure to dust could lead to respiratory distress. With respiratory condition avoid dust exposure.

### INGESTION:

Non-toxic

### Eyes:

Dust is an eye irritant. Flush eyes with water if contaminated and relocate to fresh air.

## 5. FIREFIGHTING MEASURES

Extinguishing media:	Ansul dry chemical. Water may be used on burning material that has been segregated from uninvolved product.
Special Fire Fighting Procedures:	Self-contained breathing apparatus, protective clothing. Segregation of involved, smoldering product from uninvolved product. The burning material can be extinguished with water. Avoid getting the uninvolved product wet.
Unusual Fire and Explosion Hazards:	Supports combustion only poorly. The relative explosion hazard of the dust is severe, similar to flour and grain products. As with any finely divided organic solid, dust may be explosive if mixed with air in critical proportions and in the presence of an ignition source. Spontaneous combustion may occur when product moisture exceeds 12%.

## 6. ACCIDENTAL RELEASE MEASURES

### Steps to Be Taken in Case Material is Released or Spilled:

Collect with some mechanical device. Avoid generating dust explosion hazard.

## 7. HANDLING AND STORAGE
